

Anne Odom (she/her)

Live curious. Create with compassion. Bring joy.

Data Engineering & Full Stack Development | afodom207@gmail.com | 217-377-5434 | Champaign, IL

Skills

- Professional Experience, databases: Microsoft SQL Server, mySQL, MariaDB, PostgreSQL
- Academic Experience, databases: MongoDB, NoSQL
- Professional experience, full stack: HTML5, CSS, JavaScript, ASP.Net Core, APIs, Razor Pages, C#, VB.Net
- Academic Experience, full stack: Express, Node.js, Bootstrap, Tailwind, React, Python, R
- Curiosity to learn new things, compassion in interactions with people of all talents and walks of life, and joyful application of skills to build community with any team

Experience

Full Time Caregiver *July 2024 - July 2025 (12 months)*

Live-in primary caregiver for adult child with severe PTSD, providing constant companionship, compassionate support, and medical intervention

- Managed a team of medical specialists, insurance advisors, and facility representatives
- Actively assessed physical and mental health status on a daily basis to prevent self-harm and mitigate non-verbal, paralytic episodes
- Researched options for long term residential to find a long-term care facility to fit treatment requirements and safety accommodations

Pursued education and certifications to retain career skills in Full Stack Development

Software Developer at Prairie Research Institute, University of Illinois at Urbana-Champaign

May 2019 - May 2024 (5 years)

Created online applications and data models to enhance PRI's efforts to research solutions for a society undergoing climate and energy transitions:

- Built a Pest Degree Day Calculator to increase crop yields for 120,000+ farmers across Illinois by predicting pest activity to inform strategic farming decisions. Modeled current and future pest activity on more than a decade of historical data in concert with NOAA weather information. *VB.net, asp.net, javascript, python, ARCGis, SOAP, css, html, MS SQL Server*
- Recreated and refined an online request system, improving tracking of requests and reducing stress for the facilities and workshop team responsible for meeting the needs of PRI's 600+ scientists, researchers, and staff. *VB.net, asp.net, javascript, css, html, MS SQL Server*
- Developed R2D2, an inventory relocation tool, to minimize misplacement of University equipment, reduce workload of PRI inventory management, and streamline the inventory relocation process for PRI's five scientific surveys spanning 99 locations. *ASP.Net Core, C#, MVVM (Razor Pages), javascript, css, html, MS SQL server, University Enterprise Data Warehouse*

Introduced new tools, communication approaches, and learning opportunities, to foster community and professional growth among team members. Researched and championed the adoption of code and database versioning using GitHub and DBForge, simplifying our ability to share work and maintain

development history. Demonstrated requirements gathering techniques and client relationship interactions to ensure we built tools that provided their desired advantages.

Process Consultant at Applied Technologies for Learning in the Arts & Sciences

University of Illinois at Urbana-Champaign *June 2018 - May 2019 (9 months)*

Audited customer support habits at the ATLAS help desk to identify tools and process improvements for reducing team member overwhelm and minimize lost support requests. Introduced JIRA as a ticket tracking system, developed custom JIRA reports for ongoing use, and trained the team to take advantage of the software's tools for internal planning, organizing issues, documenting issue progress, and transparent reporting to leadership and developers of the learning management system. *JSQL*

Vice President of Operations at Bippi Inc *Dec 2016 - Oct 2017 (~1 year)*

Managed day-to-day operations to support growth of million dollar per year product development business. Developed and provided data reports on profit and loss, financial projections, client retention and churn, and company rate of growth. *VBA, Excel*

Project Manager at Volition Game Development Studio *Nov 2004 – Dec 2016 (12+ years)*

Supported teams of up to 120 people suffering constant stress and pressure through video game design, development, beta releases, and delivery to market, by coaching, advising, listening, and building community

- Constructed custom reports from data I gathered from multiple sources and more than a decade of projects to encourage human-centered decision making and studio strategic plans. *VBA, Excel graphing and modeling*
- Built custom modules for third part web applications like Drupal, Sharepoint, and Confluence to minimize the burden of documentation for developers and decrease pain points caused by missed communication. *HTML, CSS, Javascript, VBA*
- Brought together minds of all kinds with respect and care, facilitating understanding and healthy interactions across game designers, coders, audio engineers, 2d artists, 3d artists, quality assurance team members, and more.
- Introduced Agile development practices to simplify reporting requirements for developers while being able to provide better visualizations of progress to studio management and international game publisher.
- Titles supported: Saints Row, Red Faction Guerrilla, Saints Row The Third, Saints Row IV, Agents of Mayhem

Software Engineer at Pixo Tech *August 1999 - November 2004 (5+ years)*

Developed and maintained full stack applications for clients, including University of Illinois at Urbana-Champaign, McGraw-Hill Publishing, Illinois Department of Child and Family Services, United States Geological Survey, Champaign Urbana Community Wireless Network, Illinois Math and Science Academy and more. *Java, JavaScript, Perl, MySql, HTML, CSS*

Education

University of Mississippi B.A., Philosophy *May 1997*

Parkland College A.A.S., Database Systems and Development *May 2019*

Codecademy Full Stack Certification *March 2026*
