

Anne Odom (she/her)

Live curious. Create with compassion. Bring joy.

Full Stack Web & Application Developer | afodom207@gmail.com | 217-377-5434 | Champaign, IL

Skills

- Languages & Markup: C#, VB.NET, Python, JavaScript, SQL, HTML, CSS
- Frameworks & Libraries: React, Node.js, Express, .NET, ASP.NET, Tailwind, Bootstrap, jQuery, ClosedXML
- Databases: Microsoft SQL Server, PostgreSQL, MongoDB, MySQL, SQLite, MariaDB
- Tools & Platforms: Visual Studio, VS Code, GitHub, Jira, SharePoint, Confluence, AI-assisted development
- Curious and compassionate collaborator who builds community and brings joy to every team.

Experience

Independent Full-Stack Development & Study *July 2025 - Present*

- Developed TTGCollector, a full-stack board-game collection app with BoardGameGeek data import. *PostgreSQL, Express, React, Node, Sequelize ORM, Express Session auth, BoardGameGeek API import*
- Built a C# console application that parses inconsistent Excel workbooks. *ClosedXML*
- Building a personal portfolio site. *React, Vite, Tailwind*

Full Time Caregiver *July 2024 - July 2025 (12 months)*

Live-in primary caregiver for adult child with severe PTSD.

- Coordinated medical specialists, insurance advisors, and facility staff
- Monitored daily health to prevent self-harm and support through acute distress
- Researched long-term residential care to meet treatment and safety needs

Software Developer at Prairie Research Institute, University of Illinois at Urbana-Champaign

May 2019 - May 2024 (5 years)

Created online applications and data models to enhance PRI's efforts to research solutions for a society undergoing climate and energy transitions:

- Built a Pest Degree Day Calculator to increase crop yields for 120,000+ farmers across Illinois by predicting pest activity to inform strategic farming decisions. Modeled current and future pest activity on more than a decade of historical data in concert with NOAA weather information. *VB.NET, ASP.NET, JavaScript, Python, ArcGIS, SOAP, CSS, HTML, MS SQL Server*
- Recreated and refined an online request system, improving tracking of requests and reducing stress for the facilities and workshop team responsible for meeting the needs of PRI's 600+ scientists, researchers, and staff. *VB.NET, ASP.NET, JavaScript, CSS, HTML, MS SQL Server*
- Developed R2D2, an inventory relocation tool, to minimize misplacement of University equipment, reduce workload of PRI inventory management, and streamline the inventory relocation process for PRI's five scientific surveys spanning 99 locations. *ASP.NET Core, C#, MVVM (Razor Pages), JavaScript, CSS, HTML, MS SQL Server, University Enterprise Data Warehouse*

Championed code and database versioning (GitHub, DBForge) and fostered team learning and community.

Process Consultant at Applied Technologies for Learning in the Arts & Sciences

University of Illinois at Urbana-Champaign *June 2018 - May 2019 (9 months)*

Improved ATLAS help-desk operations by introducing JIRA ticketing, custom reports, and team training to reduce lost requests and overwhelm. *JQL*

Vice President of Operations at Bippi Inc *Dec 2016 - Oct 2017 (~1 year)*

Managed operations for a \$1M+/yr product business; produced P&L, financial, and client-retention reports. *VBA, Excel*

Project Manager at Volition Game Development Studio *Nov 2004 – Dec 2016 (12+ years)*

Supported teams of up to 120 through AAA development of Saints Row, Red Faction, and other titles. Introduced Agile practices and built reporting tools for human-centered decisions. *VBA, Excel, JavaScript, HTML, CSS*

Software Engineer at Pixo Tech *August 1999 - November 2004 (5+ years)*

Developed full-stack applications for university, government, and publishing clients (University of Illinois, McGraw-Hill, USGS). *Java, JavaScript, Perl, MySQL, HTML, CSS*

Education

University of Mississippi B.A., Philosophy *May 1997*

Parkland College A.A.S., Database Systems and Development *May 2019*

Codecademy Full Stack Certification *March 2026*
